

Recess measurement

If you want your blind to sit inside the window recess follow the guide below and choose recess measurement when configuring your blind. If you want your blind to fit outside of the recess see page 2.

Simply measure as shown below and write down the measurements (in cm) in the boxes provided. Look out for the position of handles and any other obstructions; you will need to take these into account when measuring.

Shortest width (in cm) =

Shortest drop/length (in cm) =

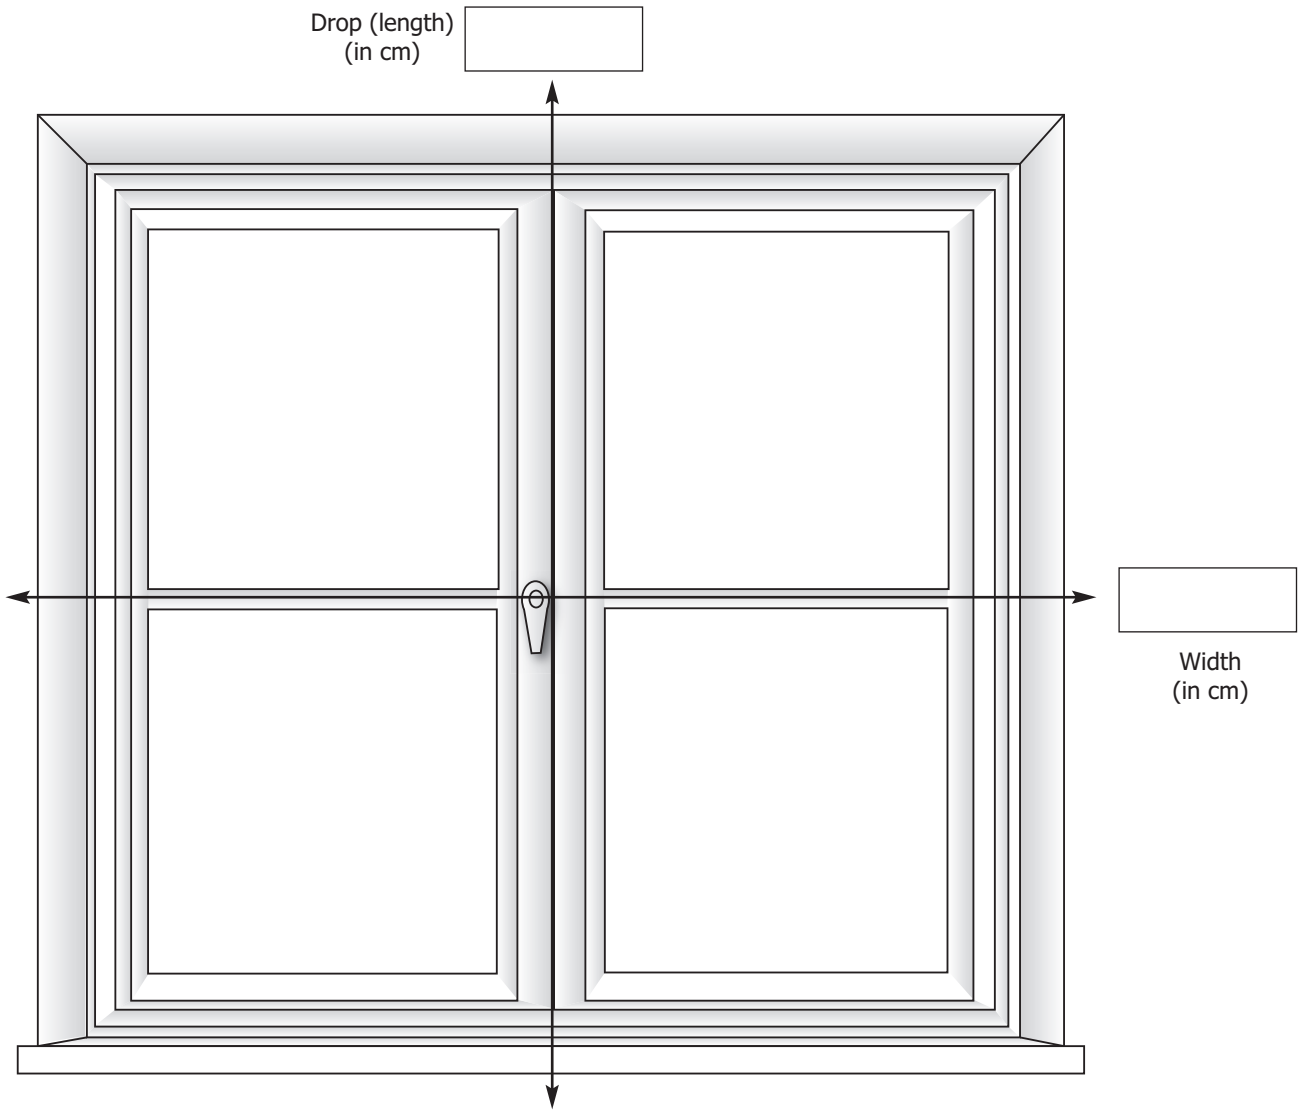

Please use the shortest measurements to order your blind. Don't adjust your measurements to allow for fittings and headrails – we do all that for you.

Exact measurement

If you want your blind to sit outside the window recess follow the guide below and choose exact measurement when configuring your blind. If you want your blind to fit inside of the recess see page 1.

Simply measure the window for where you want your blind to be, an example is shown below, and write down the measurements (in cm) in the boxes provided. Look out for the position of handles and any other obstructions; you will need to take these into account when measuring.

Width (in cm) =

Drop/length (in cm) =
